RE: Notice of Violation

Dear Mr. Lester:

Reference the inspection of the General Electric Company plant by George Morris of the Industrial and Hazardous Waste Management Program to determine the compliance status of hazardous waste treatment, storage and disposal facilities pursuant to the requirements of Sections 391-3-11-.08 and 391-3-11-.10 of the Georgia Rules for Hazardous Waste Management. The hazardous waste facilities inspected are listed as follows:

1. Drum Storage Area

Each of these facilities was noted to be in violation of Georgia's Rules for Hazardous Waste Management, Chapter 391-3-11. As Georgia's Rules adopt and incorporate by reference the Federal Regulations found in Section 40 CFR, the following general facility violations are called to your attention:

40 CFR 265.13 "General Waste Analysis Plan" because the plan needs expansion to include rationale for selection of parameters and the addition of sampling methods;

40 CFR 265.37 "Arrangements with Local Authorities" because the facility has not made arrangements with local authorities to familiarize them with the layout of the facility and properties of hazardous wastes handled at the facility;

40 CFR 265.50 "Contingency Plan and Emergency Procedures" because plan does not include arrangements agreed to by local police, fire, hospital, and emergency personnel to coordinate emergency services and does not include an evacuation plan or list of emergency equipment.

Facility specific violations were noted as follows:

No facility specific violations were noted.

Since these requirements have been effective since November 19, 1980, we feel that December 15, 1982 provides sufficient time to comply with these requirements. A follow-up compliance schedule inspection of the plant is planned at that time.

Please find enclosed a copy of the referenced Georgia Rules for Hazardous Waste Management and, per your request, a copy of the inspection report. Should you have any questions, please feel free to call at 404/656-2833.

Sincerely,

*Moses N. McCall III*
